At a Glance

As a design professional, I am looking to extend my services out to new clients and get involved in new and exciting projects. With a mixed background in both graphics and development, I easily bridge the gap between designer and programmer.

Facets

Anime, Animals, Cuisine, Fitness, Martial Arts, Movies, Reading, Straight Razors

Design Values

I strive to create a uniqueness in my work that emphasizes not only quality, but attention to detail while retaining its simplicity. Graphic design is not just the fulfillment of a need, but a way to express an idea in an innovative way. While doing any programming or development, I adhere to all the current standards to create reliable and usable code.
